PROFILE

Aspiring Full Stack Developer with basic experience in front-end and back-end development. Comfortable working with HTML, CSS, and Python, and learning to build web applications step by step. I thrive in collaborative, fast-paced environments and actively seek mentorship to deepen my knowledge and sharpen my skills. As a dedicated learner, I'm excited to contribute to innovative projects that bridge creativity and functionality.

WORK EXPERIENCE

- **University Project** MARCH 2025
Online Shop Management System (Third year, first semester Database final project)
 - Description: Developed a full stack web application for managing an online electronics shop, with features for product listings, categories, and customer data.
 - Tech Stack: Django, PostgreSQL
 - Key Achievements:
 - Designed and implemented a relational database with tables for products, categories, orders, and users.
 - Built CRUD functionalities using Django views, models, and templates.
 - Ensured data integrity using PostgreSQL constraints (primary/foreign keys, unique fields).
 - Focused on modular design for future scalability and integration.
- **AMERICAN CENTER YANGON** JANUARY 2024 - JUNE 2024
Community Volunteer
 - I volunteered at the American Center Yangon, primarily contributing to customer service. I collaborated with a team of volunteers to support program coordinator and program support officers in various center events. My responsibilities included interacting with visitors, including foreigners, providing information about the center, and answering their inquiries.
